Projects

Gaming Quiz API   April 2022 – May 2022
Project: A free API that puts your knowledge to the test with a collection of video game-related questions
- Designed a REST API with gaming related questions for other developers to use in their projects
- Collected questions and answers to store into a database for the API
- Illustrated the API with a website hosted on GitHub using HTML, CSS, and JavaScript
- Deployed the API successfully to Microsoft Azure for public use

Ludwig Jam, itch.io   October 2021
Project: Ludwig Jam is a 10-day game jam, where contestants will create games based on the theme
- Developed a Foddian game with a car advancing up a hill
- Implemented a road building tool for the vehicle to drive on
- Conducted iterative testing throughout the design and development life cycle
- Collaborated with three other people as a team to finish the project on time

CVTC, Eau Claire   April 2021 – May 2021
Project: Finale school project
- Coordinated a dynamic informative fitness website for users using C# & SQL
- Created code from data model and created database, in close coordination with developers
- Used Git and GitHub to manage version control and documentation
- Discussed with two other classmates weekly as a team and setting goals for each other

Experience
